

# What does success look like for the CBC?

# What can you bring to the table to help the CBC succeed?

**Expertise in salmon recovery**

Experience and expertise on salmon management and restoration - a basis to recommend urgent actions to benefit fish and their habitats

Tribal perspective on the importance of salmon and the ecosystem as a whole.

A solid knowledge of salmon science and river ecology, long experience with salmon recovery policy processes and a commitment to work collaboratively to find solutions that work for multiple interests.

commitment, knowledge, willing to listen respectfully to seek solutions for a Columbia River Basin Plan

strong and consistent implementation of the Clean Water Act in partnership with states and tribes

**Commitment to see, hear, and work with diverse groups for a clear path forward**

**relationships to connect region to national level**

**willingness to be creative and address challenging issues**

**Passion, Commitment, Hard Work, Follow Through**

Respect for the knowledge and experience around the table

A belief that the conversation can and should be about when, not whether.

Open mind and willingness to engage in uncomfortable discussions

effective and collaborative administration of the Columbia River Basin Restoration Act toxics reduction grant program

Honest and inclusive dialogue, relationships and existing programs with many in the region, tools to put work on the ground.

may not be all about the salmon, but as we take care of salmon, all else follows. Willingness to listen and find compromise that allows progress to still be meaningful. An internal audit approach to sticking to facts, numbers, and

Genuineness, pragmatism, willingness to listen & learn; ability to advocate/lobby decision makers on implementing recommendations & securing funding.

**tools and programs to implement solutions**

Understanding of operational requirements

Technical expertise based on modern science and thousands of years of spiritual interaction with the waters of the region

Deep knowledge of the PNW energy world including resource and capacity constraints.

**Buy-in to Basin goals from regions outside of the Basin.**

**Commitment to provide technical expertise from NOAA Fisheries**

Extensive experience in maximizing conservation outcomes in both the federal and FERC hydro systems. Negotiating complex FERC licenses and integrating them into the broader watershed.

Technical expertise on balancing clean energy interests with environmental and ecological impacts.

Perspective and data that supports salmon management and reintroduction to the blocked areas

Expertise in various fields: energy, transportation, fisheries, fish biology...that can help focus on action and outcomes.

# What do your I/REG colleagues bring?

Diversity of perspective. Knowledge that I lack.

Alternate view of the Columbia River System

a diversity of perspectives, and added capacity to implement the solutions the group agrees to

Valuable perspectives that expand our vision

Diversity, Commitment, Talent

Diverse perspectives and a wide range of expertise.

Depth and diversity of viewpoints and knowledge

Full basin perspective

Enthusiasm

Open minds - willingness to look outside the box to craft a path forward

Respect for each other

Openness and willingness to listen to and understand different perspectives, but with common vision for success (robust and harvestable salmon).

Proven commitment to build strong relationships.

The right people at the right time for action.

The potential to move forward together -- we're much stronger working together toward a common goal than we are working against each other

passion and knowledge to address all issues in the basin and willingness to work together

keys to the solution

tribal ecological knowledge

Deep knowledge of a variety of relevant subjects, commitment to work collaboratively, desire to recover salmon.

A deeper understanding of the history and culture of the northwest.

Region wide understanding of the collective challenges we face and the willingness to find ways to get work done.

Sharing the plan to gain support for a Columbia River Basin plan implementation from our working together

Policy which is driven by long term sustainability based on science

commitment to restoring salmon to healthy and harvestable levels and understanding the time to act is now.

The only strength this group has is presenting a single committed voice on consensus solutions.

Influence

persistence

Vision, DC Clout, passion
