## **Idaho Wolf Depredation Compensation Program-2022**

The Idaho Governor's Office of Species Conservation (OSC) has funding from the U.S. Fish and Wildlife Service to compensate Idaho livestock producers who have incurred livestock losses due to wolves during the 2022 calendar year. In the past, Defenders of Wildlife (DOW) compensated Idaho producers for livestock losses due to wolves that were verified by USDA APHIS-Wildlife Services. However, DOW ended its wolf depredation compensation program in Idaho in 2010, and thus shifted the compensation responsibility to the State.

Since 2010, the State of Idaho has received intermittent funding from the federal government to compensate livestock producers for wolf-related livestock losses. As a requirement for receiving these federal dollars, a 50% match by the applicant is required. Match can be in the form of cash or in-kind contributions. Compensation dollars may be prorated among the requests dependent upon the number of claims filed versus the amount of funding available. Only verified wolf-depredation losses based upon field examination are available for compensation. ***Verified wolf-depredation loss compensation will only be based on confirmed kills, probable kills will not be eligible for compensation based on USFWS stipulations.***

### **PLEASE INCLUDE THE FOLLOWING INFORMATION WITH THIS CLAIM FORM. FAILURE TO DO SO COULD RESULT IN A DELAY OF PAYMENT OR YOUR CLAIM NOT BEING CONSIDERED:**

1. Documentation confirming livestock loss. Please contact your local USDA APHIS-Wildlife Services field representative for investigative report.
2. Documentation of 50% cash match or in-kind matching contributions for livestock losses (forms included in this claim packet).
3. Signed Combined Substitute W-9 form - Idaho State Controller's Office or IRS W-9 form.

**Claims for compensation for 2022 losses are due no later than December 30, 2022.** Please submit claims and supporting documentation to:

## **How to provide match documentation**

The Idaho Wolf Depredation Compensation and Prevention Program is partially funded through a federal grant titled the Wolf Livestock-Loss Demonstration Project (WLDP). These funds require a 50% non-federal match. This can be in the form of cash, volunteer efforts, donations of goods and services, time and equipment used in dealing with wolf/ livestock conflicts.

Each applicant must submit detailed documentation of contributions with their claim for wolf-related livestock losses and/ or wolf depredation prevention activities and projects. This would include human presence, time driving out checking on livestock because of wolves, if you have a range rider or you are the range rider that time that has the goal of preventing wolf livestock conflict. Any work or equipment that you use to do more than you normally would because wolves are on the landscape (doctoring livestock injured by wolves, going out with Wildlife Service for confirmations, etc.). Included in this packet are matching forms to assist applicants in documenting matching contributions. All matching contributions must be properly documented for each applicant receiving funding. It is critical that the match documentation include the signature and contact information of the responsible person for the contribution documentation.

## **Definitions**

**Matching Funds:** Cash or "in-kind" support contributed to carry out the project. The required minimum match for Idaho Wolf Livestock Loss Demonstration Project funds is 50%. Only the additional use of time/resources, above and beyond normal livestock management activities can be counted toward match.

**In-Kind Contributions:** The value of non-cash contributions provided. Non-cash contributions can be in the form of charges for personal services, real property, non-expendable personal property, and the value of goods and services directly benefiting and specifically identifiable to the project. Included in this claim packet is a list of standard rates used for labor and various types of equipment.

## **Are you interested in reducing conflict before it happens?**

If you are interested in getting help with preventative measures and efforts that may reduce conflict such as range riders, fladry, temporary pens, livestock guardian dogs and other methods. For interested producers, OSC will work with you and Wildlife Services to find the appropriate technical assistance to develop proposals that ensure the highest probability of success when implementing these measures.
