

My name is Monique Evancic and I'm a business owner and parent living in Boise. I'm concerned that the recommendations from the federal DEIS report to maintain the four lower Snake River dams will influence your efforts to get Idaho's fish off the endangered species list. We cannot continue the status quo because it is obviously not working and the declining fish population are proof of that. We need a more impactful solution in order to see significant improvement in fish numbers quickly. This is important to me as a steward of the outdoors for myself and my child's future. I appreciate you listening to my comments. Thank you very much for your important work on this.

Sincerely,

Monique Evancic
